

Marjan Azarafrooz

Accomplished architect and interior designer, specializing in BIM-based projects

Master's degree in Energy & Architecture and a Bachelor's degree in Interior Architecture

Marjan is an accomplished architect and interior designer, specializing in BIM-based projects that span architecture, structure, and MEP (mechanical, electrical, and plumbing) disciplines. Her expertise lies in offering a comprehensive and integrated approach to design, ensuring that every project is cohesive, innovative, and meticulously coordinated.

With a deep understanding of BIM workflows, Marjan excels in facilitating collaboration among multidisciplinary teams, driving efficiency and precision throughout the design and execution process. She is adept at creating detailed models that ensure seamless integration of architectural, structural, and MEP components, delivering high-quality results tailored to client needs.

Her design philosophy blends functionality and aesthetics with a strong commitment to sustainability and regulatory compliance. Marjan's leadership skills allow her to manage teams effectively, ensuring projects are completed on time and within budget, all while maintaining clear communication and project goals.

Holding a Master's degree in Energy & Architecture and a Bachelor's degree in Interior Architecture, Marjan's education has equipped her with a solid foundation in both the technical and creative aspects of design. She has worked on significant projects, including a 34,000 m² residential complex in the Middle East, luxurious villa designs with the Carmassi Group, and a hospital project in Tehran.

Marjan's holistic approach to architecture and design, supported by her technical proficiency in industry-leading BIM software, makes her a valuable asset to any project, delivering excellence in every aspect of her work.
